

Sample Size:

n = 4 pcs x 6 lots

Presumption of Lifetime:

※ This data exceeds the absolute maximum rating. Please treat this data as the reference.

Notes:

1. This data is the presumption value, hence cannot make a guarantee of these characteristics. Please treat this data as the reference.
2. This data may differ depending on conditions and environments.
3. This is the presumption data based on 6000hrs life test data. We may change contents without notice.

Additional:

Graph is manufacturers specification. Spectrum Illumination drives standard lights with IF=350mA with an estimated Tj=60°C (Light back plate at 50°C). In this case SI estimates 50,000+ hours at 50% optical power.
