VISION AND COLLABORATIVE ROBOT TRADE SHOW

TUESDAY, MARCH 6, 2018 | 8:30 AM - 5:00 PM | HENRY FORD COLLEGE

Are you currently utilizing machine vision or collaborative robots? If so, you are likely aware of this growing market and the drastic changes that are on the horizon. From quality assurance to hazardous environments, these technologies are reshaping the way you do business. Now, there is an opportunity for you to learn more and gain insight into the future.

Come learn about the quickly changing industry trends and find solutions for your factory automation success. During this event, you will have the opportunity to meet with industry leaders and gain insight into the future of vision and collaborative robots. Discover innovative ways this growing industry is creating jobs, saving lives, increasing profitability, and how it will change your future of manufacturing.

Topics will include:

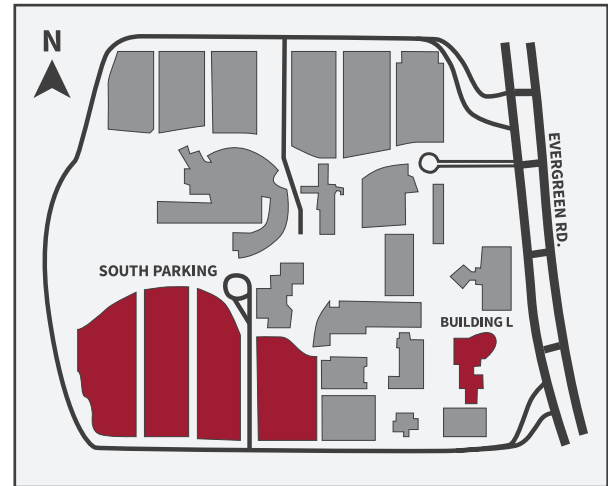

- Roadmap to the future for machine vision and collaborative robots
- Learn about new industry trends
- Featured vendor presentations
- And more...

Explore vendor booths and product offerings, all while networking with industry leaders.
